

FlowCast®

The Premium Woodworker's Epoxy for Thick Pours.

What will **YOU** **CREATE** with FlowCast?

PERFECT FOR THICK POURS

½" to 1½" Thick per Layer

GOODBYE BUBBLES

Excellent Air Release

HELLO CLARITY

Cures Water Clear

GOODBYE SMELLY EPOXIES

Extremely Low Odor

Significant bio-based content
2:1 Epoxy System

FlowCast® is the next generation in clear casting resin! It's thinner, clearer, and contains more bio-renewable content. When the two parts are combined, it hardens to a water clear, durable finish to a maximum thickness of 1½" per layer. Use FlowCast® epoxy by itself for a water clear finish or add our liquid, metallic or glitter pigments to create custom colours and effects.

FlowCast® can be worked using the same tools you already have for woodworking such as a lathe, table saw, or belt sander, leaving you thousands of possibilities to create beautiful projects.
